BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

As rescanning documents will not correct images, please do not report the images to the Image Problem Mailbox.

PATENT COOPERATION TREATY

From the INTERNATIONAL PRELIMINARY EXA	AMINING AUTHORITY	•

WRITTEN OPINION

International	application	No.

PCT/US02/31154

I.	Basi	s of the opinion	_
1.	With	regard to the elements of the international application:*	
•	\boxtimes	the international application as originally filed	
	冈	the description:	
		pages 1-19 , as originally filed	
		pages NONE, filed with the demand	
		pages NONE, filed with the letter of	
	\boxtimes	the claims:	
	الاسكا	pages 20-26 as originally filed	
		pages NONE , as amended (together with any statement) under Article 19	
		pages NONE, filed with the demand	
		pages NONE , filed with the letter of	
	\boxtimes	the drawings:	
٠.		pages 1-9, as originally filed	
		pages NONE , filed with the demand	
		pages NONE , filed with the letter of	
		the sequence listing part of the description:	
		pages NONE , as originally filed	
		pages NONE , filed with the demand	
		pages NONE , filed with the letter of	
2.	lang	n regard to the language, all the elements marked above were available or furnished to this Authority in the page in which the international application was filed, unless otherwise indicated under this item. The elements were available or furnished to this Authority in the following language which is the language of a translation furnished for the purposes of international search (under Rule23.1(b)).	•
	一	the language of publication of the international application (under Rule 48.3(b)).	
		the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).	
3.	With	n regard to any nucleotide and/or amino acid sequence disclosed in the international application, the written ion was drawn on the basis of the sequence listing:	
		contained in the international application in printed form.	
	Ħ	filed together with the international application in computer readable form.	
	H	furnished subsequently to this Authority in written form.	
	H	furnished subsequently to this Authority in computer readable form.	
		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.	
		The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.	ng
١.			
4.	Ш	The amendments have resulted in the cancellation of:	
		the description, pages NONE	
		the claims, Nos. NONE	
		the drawings, sheets/fig NONE	
5.		This opinion has been drawn as if (some of) the amendments had not been made, since they have been considered to go	
	_	beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).	
*	Repla is opin	cement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to t tion as "originally filed."	in

VI. Certain document cited

1. Certain published documents (Rule 70.10)

Application No
Patent No.
US 6,182,226 B1

Publication Date (day/month/year)
30 January 2001 (30.01.2001)

WRITTEN OPINION

Filing Date (day/month/year)
18 March 1998 (18.03.1998)

Priority Date (valid claim)
(day/month/year)
18 March 1998 (18.03.1998)

2. Non-written disclosures (Rule 70.9)

Kind of non-written disclosure

Date of non-written disclosure (day/month/year)

Date of written disclosure referring to non-written disclosure (day/month/year)

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

TIME LIMIT:

The time limit set for response to a Written Opinion may not be extended. 37 CFR 1.484(d). Any response received after the expiration of the time limit set in the Written Opinion will not be considered in preparing the International Preliminary Examination Report.

V. 2. Citations and Explanations:

1. Claims 1-3, 8, 9, 22-24, 26, 30-32 lacks novelty under PCT Article 33(2) as being anticipated by Kerr et al (US 6,243,667 B1).

As per claims 1 and 22, Kerr teaches a method and a machine-readable medium having stored thereon data representing instructions that, if executed by one or more processors of a network device, cause the one or more processors to perform the method comprising: receiving a packet at a network device (see col.3, lines 55-56), the packet including a header (see col.3, lines 58-59) and a payload (implicit); tagging the packet, by a first packet-processing application of a plurality of packet processing applications, with a cache lookup key based upon original contents of the header, the cache lookup key indicating where in a unified cache a cache entry corresponding to the packet will be stored (see col.3, lines 65-67; col.4, lines 8-11; and col.6, lines 32-41 & 50-53); and those of the plurality of packet-processing applications attempting to access the cache entry from the unified cache subsequent to the tagging by the first packet-processing application using the cache lookup key rather than generating a new cache lookup key based upon current contents of the header (see col.4, lines 1-7).

As per claims 2 and 23, Kerr further teaches wherein said tagging the packet with a cache lookup key comprises populating a lookup key field of an internal packet descriptor corresponding to the packet with a hash value (see col.4, lines 8-11).

As per claims 3 and 24, Kerr teaches wherein the packet comprises an Internet Protocol (IP) packet and the cache lookup key is based upon a source IP address of the header, a destination IP address of the header, a source port of the header, a destination port of the header, and a protocol value in the header (see col.3, lines 3-5 & 58-65).

As per claim 8, Kerr teaches a method comprising the steps of a step for determining whether a cache lookup key is present in a packet descriptor associated with a received packet (see col.3, line 65 - col.4, line 7); a step for performing a lookup in a unified cache with the cache lookup key if it is determined that the cache lookup key is present in the packet descriptor (see col.4, lines 1-2); a step for creating a new cache entry in the unified cache based upon information in a header of the received packet and tagging the packet if it is determined that the cache lookup key is not present in the packet descriptor or the lookup does not locate an appropriate existing cache entry (see col.4, lines 2-5); and a step for updating an existing cache entry with module-specific information (see col.8, lines 45-49).

As per claims 9 and 30, Kerr further teaches wherein the unified cache is implemented as a hash table and tagging the packet comprises generating a hash value based upon at least a source address and a destination address in the header and storing the hash value in the packet descriptor (see col.3, lines 58-65; col.4, lines 8-11; and col.10, lines 41-48).

As per claim 26, Kerr further teaches wherein the plurality of packet-processing applications are distributed among at least two processors of the network device (see Fig.1, #140 & #540).

As per claim 31, Kerr further teaches wherein the network device comprises a router (see abstract and col.1, lines 18-19). As per claim 32, Kerr further teaches wherein the network device comprises a switch (see col.1, lines 18-19).

WRITTEN OPINION

International application No. PCT/US02/31154

Supplemental Box

(To be used when the space in any of the preceding boxes is not sufficient)

2. Claims 4, 5, 10, 25, and 27 lacks an inventive step under PCT Article 33(3) as being obvious over Kerr et al (US 6,243,667 B1) in view of Reid et al. (US 6,182,226 B1).

As per claims 4, 10, 25, and 27, Kerr teaches all the limitations including wherein the plurality of packet-processing applications includes applying packet filtering (see col.6, lines 50-53) and routing or forwarding (see col.1, lines 58-61), but he does not explicitly teach wherein the plurality of packet-processing applications includes applying one or more of Network Address Translation (NAT). Reed teaches of packet-processing applications includes applying one or more of Network Address Translation (NAT) (see col.6, lines 47-52). It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the teachings of Reed within the system of Kerr by implementing Address Translation (NAT) because Kerr teaches that in embodiments where the data packets are saved, it would be desirable to perform a name/address translation (see Kerr: col.10, lines 13-19). As per claim 5, Kerr further teaches wherein the plurality of packet-processing applications are distributed among two or more processors of the network device (see claim 26 rejection above). **NEW CITATIONS** -
